Proposal 1 : YumeStitch

1. Organisation Overview

YumeStitch, founded in 2025, is a fashion-forward brand specializing in embroidered apparel and accessories (hoodies, t-shirts, tote bags) inspired by otaku culture. Our mission is to merge anime/manga passion with elegant fashion, offering premium-quality, durable, and stylish products.

Our target audience includes anime and manga fans aged 15–35 across Africa and worldwide, with a particular focus on Gen Z and Millennials who actively participate in online fandom communities.

Vision: To become the leading otaku-inspired fashion brand in Africa while building a strong international community.

Unique Selling Point (USP): Unlike mass-printed anime clothing, YumeStitch provides sophisticated embroidered designs—a premium touch that elevates otaku fashion from casual wear to statement fashion pieces.

2. Website Objectives

The website will serve as both an e-commerce platform and a brand identity hub.

Objectives include:

Attracting 500+ unique visitors per month within the first 3 months.

Generating at least 20 confirmed online orders in the first quarter.

Collecting 50+ customer emails for newsletters and promotions.

Building brand credibility with a professional online presence.

KPIs: website traffic, number of orders, conversion rate, newsletter subscriptions, and average order value.

3. Current Website Analysis

Currently, YumeStitch relies only on Instagram and Facebook for exposure and engagement. While these platforms help build visibility, they lack:

Efficient order management (DM-based orders are hard to track).

Secure payments (customers feel less confident without a professional checkout).

Scalability (difficult to manage multiple orders and categories).

A dedicated website will strengthen credibility, streamline orders, and provide a seamless shopping experience.

4. Proposed Features

Main pages (navigation):

- Home (brand intro, categories, footer)
- Shops (filterable categories)
- About (mission, values)
- Contact (form, email, social links)

Secondary pages (functionalities):

- Category: Lists products by type (hoodies, tees, tote bags, Sweaters).
- Product page: Details, price, available sizes, "Buy" button.
- Cart: Add/remove items, view total.
- Checkout: Secure order form, payment .

Key Features:

- Fully **responsive navigation** (desktop, tablet, mobile).

- **Dynamic shopping cart** that updates instantly.
- **Pre-filled order form** with saved customer details for faster checkout.

5. Design and UX

Color Palette (reflecting otaku + premium style):

- **Bright red (#E03C31)**: Energy, passion, anime-inspired vibrance.
- **Deep black (#1B1B1B)**: Elegance, sophistication.
- **Metallic light gray (#A6A6A6)**: Neutral balance, modernity.
- **Off-white (#F2F2F2)**: Clean background for readability.

Typography:

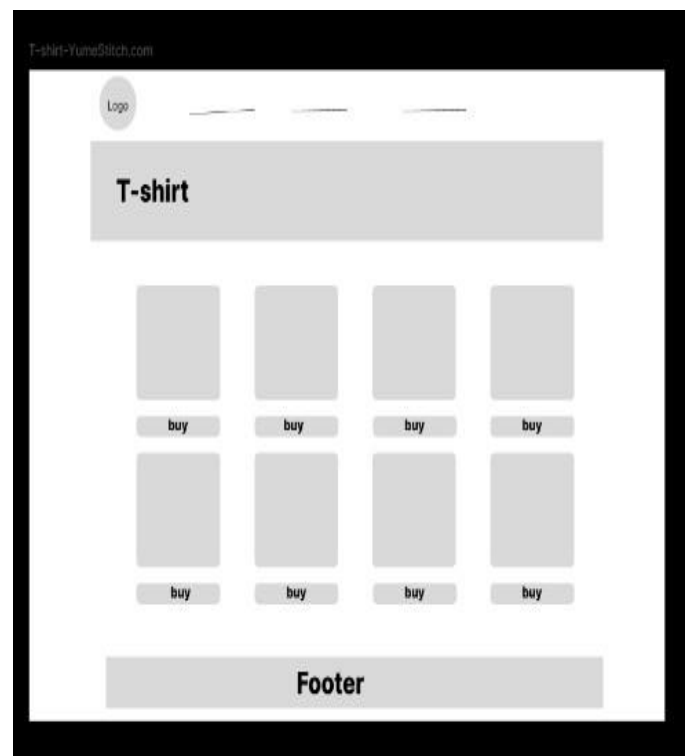

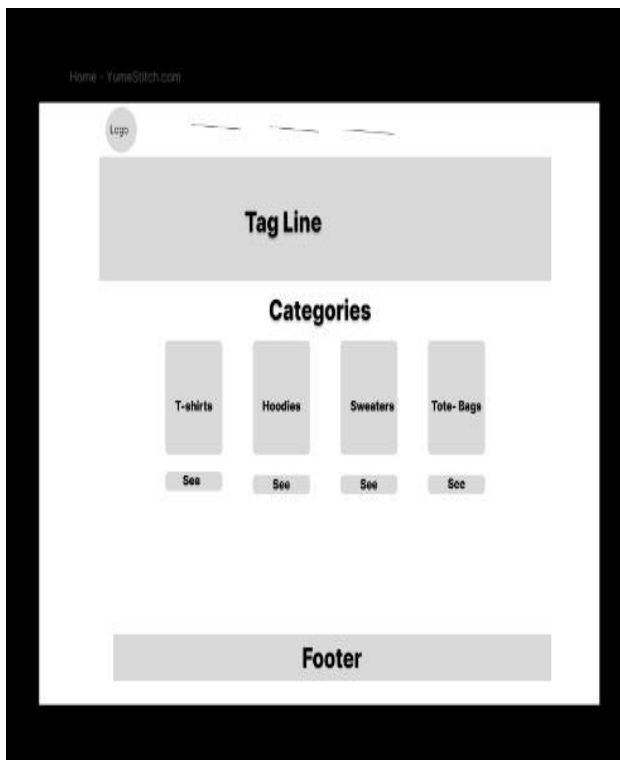

- **Titles & headings**: *Poppins* (bold, modern, youthful).
- **Body text**: *Roboto* or *Open Sans* (clean, easy readability).

Layout & UX:

- Centered logo on navbar, with **menu aligned right** and visible cart icon.
- **Homepage banner video** (anime-inspired loop, e.g. *Dandadan* gif).
- Quick purchase flow in **under 3 clicks**.
- **Hover animations** for buttons and product cards.
- **Accessibility**: high contrast colors, alt text for images, large clickable areas.

Visuals:

- Product mockups displayed in **realistic lifestyle settings**.
- Banner visuals inspired by **dynamic anime panels/gifs** (already referenced).
- Each product collection page will feature **anime-style background art** in muted tones to enhance immersion without distracting from products.

6. Technical Requirements

The site will be built using HTML5, CSS3, and JavaScript (ES6).

It will be hosted on a shared hosting plan with SSL certification and use a custom domain.

Payment integration will be done via PayPal or Stripe, along with Google Analytics for traffic tracking and a professional email contact form.

The website will be fully responsive and compatible with desktop, tablet, and mobile browsers.

Additionally, free and reliable resources such as Google Fonts for typography, icon libraries (e.g., Font Awesome), and stock images from sites like Unsplash or Pexels may be used, with final choices to be confirmed during development.

7. Timeline

Phase 1: Research & Planning – 12 to 16 August 2025

Phase 2: Design & Content Preparation – 17 to 24 August 2025

Phase 3: Implementation & Initial Testing – 25 to 26 August 2025

Phase 4: Submission of First Part – 27 August 2025

Phase 5: Improvements, Final Testing & Adjustments – 28 August to 24 September 2025

Phase 6: Final Review & Submission – 25 to 26 September 2025

8. Budget

Estimated costs include:

- Domain registration: approximately R214 per year
- Hosting: around R1,100 per year
- Maintenance (updates, backups, bug fixes): about R3,600 per year
- Payment processing fees: variable, approximately 2.9% + R6 per transaction
